DETAILED ACTION

Status of the Claims

1. This action is in response to the amendment filed on April 14, 2008.
 - Claims 1-40 are pending.
 - Claims 3, 8, 17, 21, 22, 26, 31 and 37 have been amended.

Response to Arguments

2. Applicant's arguments with respect to claims 1-40 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 15-28 and 35-40 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant recites "a component for" in claims 15-28 and 35-40; however it is ambiguous as to what the component is that the applicant is using in the system claims. It is noted that the original disclosure makes

vague references to computers, websites and the Internet; however one skilled in the art would still not know what "a component" is referring to.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-40 are rejected under 35 U.S.C. 101 based on Supreme Court precedent, and recent Federal Circuit decisions, a § 101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780,787-88 (1876). The process steps in claims (1-40) are not tied to another statutory class nor do they execute a transformation. Thus, they are non-statutory. A computer or processor is not positively nor explicitly recited in the body of any of the claims.

Allowable Subject Matter

7. Claims 7, 9-11, 21 and 23-25 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 and 35 U.S.C. 101, set forth in this Office action.
